### Lesson 04: February 28, 2014 (presentation of research)

Week 4 finalizing research, step towards design assignment

Homework Products for research presentation at BAUT

#### Program

13:45 uur – 14.00 uur	installing presentation of models and A3 prints
14:00 uur – 15.00 uur	presentation 6 groups of 10 min each
15:00 uur – 16.00 uur	presentation 'Vormstudie'
16:00 uur – 17.00 uur	borrel

#### Homework until Wednesday March 5

After a period of research in groups we will continue the course individually.

The second half of the course is dedicated to design. The conclusions of your research are the framework for your intervention. Stay true to your conclusions; it will help you when you get stuck in your design process.

To start the design phase with an open mind you are asked to develop two extreme directions for your design proposal for next Wednesday.

You can choose two different design assignments that are very different from each other to explore the possibilities.

You can also choose only one design assignment, but then you are asked to sketch two extremes as opposite directions. (e.g. a design for 1 user, and for 200 users; or a design for rain and one for sunshine; one with soft material, one with concrete) any pair of extremes is possible.

#### Please note:

These first sketches for a design can be based upon the design assignments you have developed together. It is possible, that both former group members choose the same design assignment, but both must develop their own design(approach) from now on.

Present the design sketches in the model you've made of the location (don't glue them because it is a shared model!) It might be a good idea to present (sequences of) pictures of your proposal that you took with your sketch design placed in the model. If needed, you can support your ideas with sketches or models in a different scale.

While sketching and designing keep in mind *availability of materialization* (cheap/available materials / the possibilities from the form study) and the *simplicity of realization* (ideally able to be build it in one day).

Good luck!

Pleas e-mail your homework to: [mathias@legu.nl](mailto:mathias@legu.nl)
